1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, drawn to a method for enhancing an immune response, classified in class 514, subclass 885.
  - II. Claims 6-9 to drawn to a method for enhancing tolerance, classified in class 424, subclass 193.1.
  - III. Claims 10 and 11, drawn to a conjugate, classified in class 530, subclass 391.1.
  - IV. Claim 12, drawn to a method of delivering a preselected molecule, classified in class 424, subclass 178.1.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions III and I/II/IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the claimed conjugate could be used as an immunogen to produce antibodies which bind said conjugate.
4. Inventions I/II/IV are different methods. These inventions use different process steps to achieve different goals. Invention I is drawn to a method for enhancing an immune response which uses an agent that ligates CD40, while Invention II is drawn to a method for enhancing tolerance which uses an agent that prevents maturation of dendritic cells, whilst Invention III is drawn to a method of delivering a preselected molecule. Therefore, the aforementioned methods are patentably distinct.
5. Because these inventions are distinct for the reasons given above and the search required for any group from Groups I-IV is not required for any other group from Groups I-IV and Groups I-IV have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1644

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Papers related to this application may be submitted to Group 1600 by facsimile transmission. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). Papers should be faxed to Group 1600 at (703) 308-4242.

9. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Dr. Ron Schwadron whose telephone number is (703) 308-4680. The examiner can normally be reached Monday through Thursday from 7:30 to 6:00. A message may be left on the examiners voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the Examiner's supervisor, Ms Christina Chan can be reached on (703) 308-3973. Any inquiry of a general nature or relating to the status of this application should be directed to the Group 1600 receptionist whose telephone number is (703) 308-0196.
